

Blanken Controls BV

Company profile

Blanken Controls was founded in 1979 as importer / wholesaler of measuring and control instruments. Partly due to market needs and developments, Blanken Controls has developed into a (European) Service Center in the field of calibration, repair and management of all your measuring and control instruments.

In addition, Blanken Controls is the certified European service center for the settlement of factory warranty cases for a number of American Producers.

Blanken Controls manages your Instruments using a self-developed digital platform: Extranet.

With Extranet, users can easily manage their own measuring instruments, view and download calibration certificates, and place orders for calibration or repairs.

Extranet provides an easy to use tool to manage all your instruments and provides a complete overview.
